PROFESSIONAL SUMMARY

Data analyst and Business Intelligence professional with a Master's degree (UNIR) and experience analysing business data across finance, retail and telecom environments. I build Power BI dashboards, design ETL processes and SQL queries on PostgreSQL, and apply Machine Learning to turn data into decisions. My background in management control lets me understand the business behind each metric and its impact on the P&L. Seeking a **Data Analyst, BI Analyst or Operations Analytics** role where data drives real impact.

PROFESSIONAL EXPERIENCE

Data Analyst / Business Intelligence · Grupo Vectalia (Alicante, Spain) Jan 2026 – May 2026

- Extracted and modelled analytical data from the corporate ERP across business units.
- Designed Power BI and SAP BI dashboards with profitability, margin and variance KPIs.
- Analysed historical data and tracked monthly indicators for executive reporting to General Management.
- Provided analytical support to management areas and economic studies for decision-making.

Data Analyst / Controller · Vacavaliente EU (Elche, Spain) Jul 2025 – Dec 2025

- Analysed business KPIs (sales, margins, promotions, ROI) and tracked budget-vs-actual variances.
- Automated administrative, commercial and logistics processes; rolled out the Odoo ERP with bulk data migrations.
- Built tools and reports that improved the quality of information for decision-making.
- Trained teams on the ERP and reporting tools.

Business Intelligence Analyst · Finetwork (Elda, Spain) May 2025 – Jun 2025

- Optimised SQL queries on PostgreSQL and structured data to ensure quality and accessibility.
- Built and optimised Metabase reports and dashboards: company activity, quality and processes.
- Administered the reporting platform (dashboards, permissions) and supported business users.

Data Analyst / Banking Back Office · NTT Data — client: CaixaBank (Alicante, Spain) Dec 2023 – Nov 2024

- ETL processes with SQL and daily, weekly and monthly data exploitation with Power BI and pivot tables.
- Reporting of futures and options on exchange-traded derivatives (ETDs) in domestic and international markets.
- Settlement, reconciliation and closing control of trades; preparation of financial reports.

SELECTED DATA PROJECTS

- **Master's Thesis — End-to-End BI System for Altadis (Imperial Brands)**: ETL in R, PostgreSQL Data Warehouse (star schema) and executive Power BI dashboards with clustering (K-Means, PCA) and predictive models.
- **Bachelor's Thesis — Leroy Merlin sales & review analysis**: statistical analysis in R (logistic regression, text mining). Grade: 8/10.
- **CTSA Field OS**: production data web application (Next.js, Supabase/PostgreSQL, n8n) with AI-assisted development. Full portfolio at portafolioadrianv2.netlify.app.

EDUCATION

- **Master's Degree in Business Intelligence (Data Analytics)** — UNIR, Spain (2024–2025).
- **Bachelor's Degree in Business Administration and Management** — University of Alicante.
